

The FCC should not implement any proposal that would lessen Indiana's Telephone Privacy law protections. It is absolutely horrible that you can't have a free moment in the privacy of your own home. Indiana has taken steps to give a little bit of privacy in our own home and now you want to take that away? This is a horrible world and HOME is the only place to get away from it. At least it used to be.

We went from 6 or 7 calls a night to a few a month with Indiana's protection policy. I will fight you with everything I have to avoid having every SINGLE minute of private time taken with this bull. The only one you are concerned with protecting the rights of are the creeps of the world. Why not stand up once in a while for the average person who doesn't want to invite the world into their home
